# SVETOSLAV MUTEV

SENIOR FULL-STACK DEVELOPER - PHP & JS

## PROFILE

I'm a passionate Full Stack Developer with 10+ years of experience in web development, specializing in PHP frameworks, microservices, and scalable architectures. I focus on delivering high-quality solutions that drive value, not just through code, but by optimizing processes and ensuring alignment with business goals. Skilled in both backend and frontend development, API integration, and cloud infrastructure, I enjoy managing projects from start to finish and collaborating with cross-functional teams.

## WORK EXPERIENCE

- **Peoplefone AG** 2023 - 2024  
Senior Full-Stack Developer
  - Maintained and improved two monolithic applications and developed several microservices, primarily using Laravel with VueJS and nodeJS for realtime apps.
  - Worked remotely as the only off-site developer in a hybrid team, collaborating on planning and development.
  - Participated in technical discussions and frequent meetings to align on new services, architectural changes, and project priorities.
- **Parkos BV** 2021 - 2022  
Senior Full-Stack Developer
  - Developed and maintained a parking rental platform using Laravel, VueJS, and Bootstrap, while supporting the transition to a microservices architecture with NodeJS and VueJS.
  - Worked remotely as a Senior Developer in a hybrid team across Europe, providing technical expertise and guidance.
  - Provided key technical insights, helping the team navigate the transition from Laravel to a JavaScript-based microservices architecture, improving long-term scalability and maintainability.
- **vConnect Ltd** 2019-2020  
Senior PHP Developer
  - Developed Laravel and Symfony projects for e-commerce platforms.
  - Created a Monitoring Dashboard using VueJS and Bootstrap to track statistics, graphs, and key data.
  - Designed the architecture for a store management platform enabling rapid creation of online stores with access to millions of products, prices, and translations across multiple markets and languages.

## WORK EXPERIENCE

- Droxic Ltd** 2017-2018  
Mid/Senior PHP Developer
  - Worked as a Mid/Senior PHP Developer on diverse projects across various stacks, including Symfony, WordPress, Drupal, Magento, and custom systems.
  - Collaborated with a range of clients, from small organizations like a football team to large enterprises such as BMW and Doctors Without Borders.
  - Gained extensive experience in adapting quickly to new tasks and switching between projects, but the role also presented challenges in managing workload and avoiding burnout.
- Circles Bulgaria Ltd** 2015-2016  
PHP Developer
  - Worked on internal projects and frontend development for customer-facing products, utilizing Yii, Symfony, Bootstrap, and PostgreSQL.
  - Contributed to a well-organized team with clear goals and long-term roadmaps.
  - This role marked my first serious position, helping me grow in project work and teamwork.
- Comstream Ltd** 2014-2015  
PHP Developer
  - Worked with a Swedish hosting company on developing a new Symfony-based platform for ordering hosting services, including domains, servers, and email accounts.
  - Focused on building and managing the platform, which replaced their old website and continues to be in use, even after 10 years, likely refactored and upgraded.
  - Used Symfony (v2/v3) and Bootstrap to deliver a high-impact solution that remains a significant achievement in my career.
- Rezon Media Ltd** 2012 - 2013  
Junior PHP Developer
  - Started my professional career, gaining invaluable experience in programming, process organization, and client/management focus.
  - Worked with an in-house PHP framework, PostgreSQL, GIT, JS, and CSS on various internal projects.
  - Contributed to some of the largest websites in Bulgaria and actively participated in new developments as part of a collaborative team.
